

# **SOUTH PRODUCTION NOTES**

**May 26, 2015**  
**7-3 Shift Notes**

**BASF EMPLOYEES**  
**117 Last Recordable**  
**632 Last Lost Time**  
**65 Days To RC Audit**

**Be sure to check weigh all bags off of the calciners and fill out the log sheet downstairs by the scale and attach "Packaged By" label with your initials.**

## **#1 MED / AI 5635**

**On hold. We may have enough material to make the order.**

## **#1 RC / AI 5635**

**Continue and maintain feed rate of approx. 500 lbs/hr. Make sure suction at .35-.40**

**Exhaust to Trimer**

## **#2 MED line / Styrene Trial done:**

**Batches finished, shut down and opened up mixer to dry out. Remaining empty drums and brought down**

## **#2 RC/ Styrene Trial:**

**Finishing calcining the last material from the extruder. Remade bag 2 from Lot 3, feed remaining bags except the remade bag. When all fresh material calcined, lower temps to 300 degrees and feed the last bag Lot 3 SS 2 marked "refeed at end"**

**Exhaust to F1**

## **#3 MED line / AI 5635:**

**On hold. We may have enough material to make the order.**

## **#3 RC / AI-5635**

**Continue to feed. Oversize screen changed to .176 x ½ per John Bodmann  
Need oversize discharge line reworked so drop is more vertical to spiral (DL Page)**

**Exhaust to CTO**

## **#4 RC / D-1135 next:**

**Continue. Oversized drums repacked and in line to refeed.**

## **Exhaust to 4 DC**

### **#5 RC / Catoxid:**

Down late on second shift due to discharge rotolock. An electrician is coming in late on second shift/early third shift to attempt to fix it. Feed screw turned up to 11 hertz Saturday morning and holding there. Also, blower filter housing cleaned out and filter cleaned up and re-installed. MUST watch for any powder discharge on roof or in building. Any issues, contact GL.

**Please take SA for this product, Gemini machines are now working.**

## **Exhaust to 5 DC**

### **#6 RC & Dryer / D 0759 next**

Most of system cleaned and about ready for D 0759, however the floor on both ends of calciner needs to be cleaned up.

NOTE: T Krupp repaired the elevator in bldg 27 but on first test it got stuck between floors. We will not be using it.

## **Exhaust to Sly Scrubber**

### **6 Tank / Ni 2458 solution**

Tank is empty.

### **New Pfaudler / D-1135:**

Continue on first shift Tuesday. A two tote tank of chrome was made on second shift in building nine.

Have extruder operator help with feeding the national.  
2<sup>nd</sup> floor will be a regulated area until more IH testing can be done.

### **7 Tank Ni-2458 Solution:**

Cleaning.

### **Old Pfaudler / D 0759 next**

Inspection complete. Need to install lid.

### **National Dryer / D-1135**

Continue on. Once this run is complete, we will need Schirmer to bead blast the dryer belt.

### **PK Blender / AI-3915 Pill Mix:**

Outlet valve still an issue after electrician inspected and after cleaning out blender. Down until guidance given on what to do/when this will be corrected. When running, be sure to use 112 bags. We cannot use 120 bags for pill mix.

### **Abbe Blender / 5206 Done**

Hold. Transfer Pump will need to be replaced. Needed it for the west pfautler.

### **Tower 3 / Empty for E 474:**

Unloaded and washed down, hold for weekend. It will eventually be loaded, then sheave change before the start of E-474 early the week of May 25.

### **Tower 6 / E 406:**

Running, continue. Should come down on midnight shift Wednesday.

### **North Screener / Switched to E 406:**

Screener changed over to E 406.

### **South Screener / Switched to E 474:**

Screener changed over to E 474.

### **#2662 (west) Pill Machine / AI-3915:**

Continue when manpower permits. More mix lifted to 2<sup>nd</sup> floor Sunday

### **#2664 (east) Pill Machine / AI-3915:**

Continue when manpower permits. More mix lifted to 2<sup>nd</sup> floor Sunday

### **TK #2 / BE 0101 done**

Finished with batches, Kiln is done

### **TK #4 / Cu 0540:**

Running. Scale has been fixed. Switching to Cu 0540 in supersacks WOW for rollers for DC drum. #8 burner repaired by Dave V.

### **Harrop Kiln / AI 4096 next:**

Zone 1 recirculation blower bad shape. Could be down for a while. Need to check status with Matt Willbond on Tuesday.

**NOTE: All raws are in the pole barn. 22,000 lbs.**

**NOTE: work order written for improved lighting fixture over car rail unloading zone (just out of cooling zone).**

### **Building 27 Belt Filter / 6081:**

**Hold for analysis and instructions**

**Elevator is not running yet. Repairs made Friday May 8 but elevator got stuck when testing to see if it works.**

**We will be looking into pumping up the solution from the 1<sup>st</sup> floor, or into one of the holding tanks if they are working.**

**Trying to determine if we can remove some of the totes of solution that are sitting on the 1<sup>st</sup> floor. If we have any bags of material, need to transfer to North end.**

### **Priorities:**

Priorities 1 through 8 should be considered urgent and will require call outs for maintenance issues and/or processing issues.

- 1) #5 RC/South PK**
- 2) West Pfaudler/National Dryer/#4 RC**
- 3) #3 MED/#3RC**
- 4) Harrop Kiln**
- 5) Horne Tabletting**
- 6) HC-11 precip/dry (if we get the ok to continue after we get the results from the 2 single sized batches)**
- 7) #1 MED/#1RC**
- 8) #4 Tunnel Kiln (should be transitioning from X-540 to Cu-0540 later today)**
- 9) #2 MED/#2 RC**
- 10) Reduction Screening**
- 11) Reduction Towers**
- 12) East Pfaudler clean up**
- 13) HC-11 Dryer/Calciner clean up**
